Sentence Capitalizer:

Write a program with a function that accepts a string as an argument and returns a copy of the string with the first character of each sentence capitalized. For instance, if the argument is **"hello. my name is Joe. what is your name?"** the function should return the string **"Hello. My name is Joe. What is your name?"** The program should let the user enter a string and then pass it to the function. The modified string should be displayed.

Notes:

• Perform tests (minimum 2) that are not using simple input.
